Research comment

The test sample was applied in the amount of 3 μ l to the BioBasic 8 Thermo Scientific column. During the course of the analysis with the method a linear gradient in the solutions of H₂O and Acetonitrile with the addition of 0.1% trifluoroacetic acid, a peaks of the sought substances appeared. Its concentration, when compared to the reference chromatogram shows the table above. Height the measurement error is + - 0,05 mg. The actual state of the sample sent before the test is presented on the photo below
